

Lopez IOSA Kinglet launch drill

On August 6th 2022, IOSA volunteers completed a small boat drill. The IOSA volunteers worked with the Lopez Fire Department to tow the Kinglet from storage to the launch ramp at Odlin Park. After a safety brief the crew launched the boat. Once underway they completed boat drills to simulate actions that would take place if responding to actual spill report.

As part of the drill, response forms were used to document the events of the day. Although relatively simple in nature, these realistic drills promote teamwork, safety and proper documentation.

Special thanks to the Lopez Fire Department for their assistance and participation!
